Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in you're account, a returned check fee may be debited from you account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

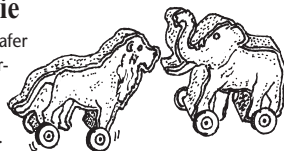

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

EMPLOYEE FAVORITES!

The Cork Menagerie

Cork menageries are much safer than glass, and cute in a different kind of way. Buy the kiddies these classic circus animals, sans circus costumes. Or buy them for yourself. Think

of them as a parade of small bulletin boards. The 1" thick cork elephants, lions and giraffes all have simple pen and ink detailing, all are approx 5" to 6" tall or long, and all are on wheels. The wheels on our samples were extremely well attached (we couldn't pull them off), but we'd still keep them from kiddies under five. We'll pick (2) different critters for you. **WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

41166 Cork Critters \$4.95/pkg(2)
Pat's Favorite! \$2.95/pkg(2)

Astronautical Snack

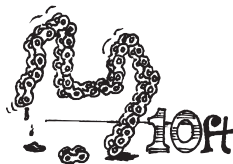

Freeze-dried Neapolitan ice cream, it says on the foil package, just like the astronauts got if they ate all of their freeze-dried peas. Not frozen, of course, or even chilled, but you get one yummy pack, ready to eat, just under half an ounce, which is more than you'd think.

89036 Freeze-Dried Ice Cream \$3.25/each
Paul's Favorite! \$2.95/each

Chain Plus Grease

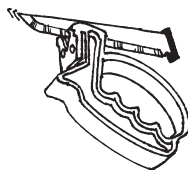

Roller chain: (10) feet of #41 with a master link; 1/2" pitch (center to center), 1/4" wide x 7/16" thick and pre-greased for your chain-installing convenience.

40646 #41 Roller Chain \$11.95/each
Cj's Favorite! \$7.50/each

Sharp

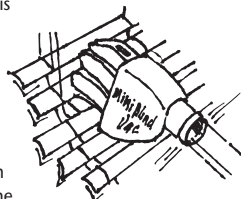

Never a dull moment, with this hand-held sharpener around. The contoured blue-plastic handle holds replaceable carbide blades and protects your fingers while you zip it over a knife edge. It's 6" long OA.

92428 Knife Sharpener \$3.75/each
Marla's Favorite! \$1.95/each

In The Kingdom Of The Blind...

Listen up: you need to buy this before your mother sees the state of your mini-blinds. Our blind-cleaning attachment fits all major vacuum cleaners, including Dustbuster®, and has (4) 4-1/2" long pointy fingers with schmutz-grabbing fabric on them to make short work of the job. Includes adapters to fit 1", 1-1/4" and 1-3/8" hoses.

41791 Mini-Blind Cleaner \$3.75/each
Joe's Favorite \$2.75/each

Bone Up On Anatomy

You're not going to blow money on an actual human skeleton, are you? Consider that for a tenth of the price you can get an anatomically accurate skeleton done in plastic. This model is male (judging by the hips) and has many articulated joints—jaw, shoulder, knee, etc. Its small size (33") makes it practical for classroom use, since it can be passed around the room. Other nice touches include discrete neck vertebrae, a sectioned skull, and very little "flash" from the plastic molds. It also comes with a metal display stand, weighted at the bottom to prevent spills. Yes, some concessions had to be made because of the size and price, but this is still an invaluable teaching tool, and quite a nice decoration for those with morbid minds.

89242 Plastic Skeleton **\$59.95/each**
Sale Price \$54.95/each

One Yorick, Extra Teeth

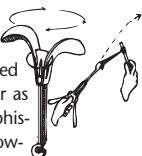

A fellow of infinite jest, of most excellent fancy. You'll want to make house room, or classroom room, for this nice budget skull in molded bone-colored plastic, about 8" diagonally from chin to back of cranium, with a handy removable and latching cranium and a spring-loaded jaw. Comes complete with a full set of teeth, (3) removable plus three spares—(2) lower front and (1) molar.

88812 Plastic Skull **\$28.95/each**
Sale Price \$26.95/each

Arrowcopter

Shoot one of these little plastic arrow-helicopter-rotor gismos straight up with the included rubber band launcher and watch it soar as far as 300 feet! A fun outdoor toy that grows in sophistication as you learn how to adjust the arrowcopter for wind conditions and flight patterns: distance, return, circular descent etc. Our "each" contains a package of two (2). Recommended for kids over the age of 9.

89602 Arrow Copter **\$6.95/each**
Sale Price \$5.95/each

Powered By Feets

Just like the original Stomp® Rocket but slightly smaller for slightly smaller feet, the Stomp® Rocket Jr. Glow also, you guessed it, glows in the dark. Includes (4) 8-3/4" tall foam rockets, launch tripod, 3-foot hose and the launching pad on which you or your young 'uns stomp to launch it up to 100 feet. Runs on air alone (no more waiting for your liquid hydrogen order from NASA) so it's safe. For ages 3 and up, depending upon shoe size. **WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.**

94074 Stomp Rocket Jr. **\$15.95/each**

The Ultra Capacitor Car™ kit includes a 6-Farad capacitor, 5-1/2" long foam and plastic chassis, wheels, axles, a small DC motor, hardware, wires and instructions for charging via "D" battery that you provide. Exceptionally long run time for a capacitor. Zippy little buggy, too. For ages 8+. **WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.**

94209 Ultra Capacitor Car **\$9.95/each**
Sale Price \$8.95/each

My, What Big Teeth You Have!

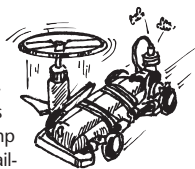

They made this big mouth for dental schools, but we think it would make a lovely addition to any decorating scheme. Measures 6-1/2" wide x 3-7/8" tall x 5-3/8" deep, with steel hinges. In addition to a full set of chompers, it has a giant (but soft) pink tongue. Comes with an 8-1/2" long toothbrush for instructional purposes, we suppose, or maybe just to keep it clean, and an 8-1/2" x 11" chart of the upper and lower jaws.

94155 Big Teeth **\$39.95/each**
Sale Price \$37.95/each

Brand Pneu Item

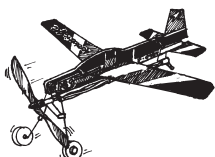

Pneumatic power is in the air, and this kit from the Jr. Scientist™ series lets budding pneumistats build an air-powered car and helicopter. Contains everything they'll need, including a pump but excluding the air, which is widely available. Comes with a 64-page manual with instructions, an intro to pneumatic power, a cartoon bio of the Wright brothers and a section on the theory of relativity because everything, after all, is relative. For ages 8 and up. **WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.**

Very Proficiently Flying

Our PC-9 rubber-band powered styro airplane boasts a big, long rubber power plant, plastic prop, and landing gear. Measures 15" nose to tail with an 18" wingspan. Takes some light assembly but, the directions say, "when you play this plane very proficiently, you will find that it can be made more wonderful flying ways." Indeed. Rated for 200 feet of flight (80% longer than the Wright brother's first flight!), but we'd avoid really windy days for the best proficiently flying.

Sale Price \$10.95/each

Crystals Grown While-U-Wait

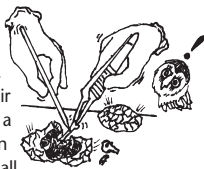

From the Science Wiz™ comes this starburst crystal-growing kit that builds crystalline sculpture and pillars before your very eyes. You get a big sack-o-sodium acetate, which is also the flavoring agent in salt-n-sour potato chips, but never mind that. You add a few household utensils, including the stove, so ask mom for help. Enough powder for "several children" it says, or, we presume, one goofy adult. For ages 8 and up, and only with adult supervision.

94208 Starburst Crystal Kit **\$9.95/each**
Sale Price \$8.95/each

Bird Yurp

Raptor vomit. Okay, owl pellets. Common barn-owl pellets actually, but don't call them common to their face. You get (2) pellets, each with a (usually) complete rodent skeleton that the owl couldn't digest, plus a small pair of rubber gloves, a pair of 5" plastic tweezers, a 6" long pointed stick and an 8-page fact sheet to help you reassemble said skeleton. Regurgitated in the USA.

Build Your Own Ornithopter

When ornithopters roamed the earth...oops, no, it just sounds like a dinosaur. The ornithopter was one of Leonardo's masterful designs, although this one just led to a bunch of guys on winged bicycles plummeting to the earth in the 19th century. Still extremely cool, however, in this kit version. Pre-cut, unpainted wooden pieces assemble with pegs to make a crank-operated moving model with a 24" wingspan, complete with a human figure, which our model-guru calls a 15th C. crash-test dummy. **⚠WARNING: CHOKING HAZARD-Small Parts. Ninety percent of them have the familiar beautiful white crystals inside. Formed by volcanic action, they are found all over the world, but ours are from Mexico. There is no way to tell from the outside if they have crystal centers, but we will send you two just to raise your odds, and we haven't had a dud yet in our stores!! **⚠WARNING: CHOKING HAZARD-Small Parts. Tektites, called glass rocks, are formed when meteorites from outer space crash into our home planet and, by Jupiter, no rock collection is complete without one! The driest of all rocks, tektites are black to olive-green, and average less than .005% water. These samples will be roughly 1/2" to 1-1/4", and you'll get (2) to (4) of them, depending upon their size. **⚠WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

What's yellow, 7-1/2" long and lowers your blood pressure? The Stress Banana. Filled with some sort of gooshy fluid that we can only imagine, it's squeezably soft and returns to its original banananness right in your hand, which CJ says is "strangely cathartic," and who among us can't use a little catharsis from time to time?

Love Meter

AKA hand boiler. An exotic bit of hand blown glass with a bulb at top and bottom connected by some zippy tubing that spirals, loops, and/or jogs. In the closed system is some colored liquid (methyl chloride) that is very light. Hold the lower bulb in you hand and as the air in the system is warmed it pushes the fluid through the loops to the upper chamber. When all the liquid is pushed out of the lower bulb, expanding air will bubble through the tubing making it appear that the liquid is boiling. **WARNING!** The glass is fragile and the liquid is nasty. If you drop the thing on e.g. the kitchen tile, it will eat the finish off the tile and the stain in the liquid will permanently stain the floor. So don't let kids handle this item unsupervised. About 7" tall, it is a favorite in our stores.

We have the Original Burp Gun® that rapid-fires small ping-pong-type balls the length of our office as fast as we can pump the barrel (no batteries needed). The Original Burp Gun®, which comes with (15) balls, is 30" long when fully extended. The Original Burp Pistol®, which comes with (7) balls, is 12" at its smallest and extends to 17". Screeching Monkey Superhero

Look! Up in the sky! It's a screeching flying monkey to the rescue! And at a screechingly low price. Our hero is an 11" long stuffed monkey in superhero togs (a cape, and maybe a mask or hood, depending on his sartorial whim). Put two fingers in the little pockets on his paws, pull his bungee arms back, and let him go. He'll fly a good 25 feet or more, issuing hideous monkey screeches all the while, faster than a flying nun and able to brighten up a day in the office in a single bound. **△WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Cymbalic Monkey

You know the one-big stupid grin, chatters, jumps up and down, pounds really annoying cymbals together and won't stop...an American classic. The originals from the '50s bring \$75 or so on Ebay, but you can get your own brand-new, latter-day cymbal-clanging primate in a little red hat for a fraction of that. Approx 7-1/2" tall, runs on (2) "AA" batteries (not included) with a power switch under his monkey bottom. **△WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Wheelie-Foot Wind-Up

You can't help but laugh at Larry the Slider, a green dancing fool who waves his jazzy little white-gloved hands, wiggles his head and drops into the splits when you wind him up. Push him sideways and he slides like a music-video fool. At 4" tall, with a smiley face and big yellow feet, he's definitely the funniest wind-up toy we have. **△WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. It works, but it's not any more than moderately well made, and not any more than moderately priced. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Children are fascinated by the bobbing bird, and the educational possibilities are great. But they should watch him, not fondle him!! Manufacturer warning states this item is not intended for children 8 and under. **△WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Original Slinky®

Does anyone need to be told what a Slinky(tm) toy is?? Okay, it is a very slack spring, 2-7/8" dia x 2-1/2" long, compressed. It will stretch out to about 5 or 6 feet long without deforming. That's the boring part. The interesting part is that it "follows" itself. Slosh it from hand to hand. Put in on the top step of stairs, flip the end down a step, and watch it walk down stairs, or down an incline. Believe us, no childhood (or adulthood) is complete without an original stainless steel Slinky(tm). It was hard for us to find it, but we are glad we did. Wow! Double Wow!

This is Philip's new favorite toy, since he blasted a rocket so high over our parking lot that he lost sight of it (the rocket, not the parking lot). The Air Burst™ Rocket system has a 26" tall, air-powered tri-pod launcher made of plastic and rigid foam. A 65" long air hose connects it to any stand-up bike pump. After a few pumps, the air pressure bursts a replaceable booster disc in the launcher and sends a 10" x 3/4" dia rocket 250 to 1000 feet into the air. Wow! The system includes the launcher, (2) rockets, and (60) boosters (two different weights). Sending rockets out of sight, even if they usually come straight back down, is an ingenious ploy for selling extra rockets. Our each is a pack of (2). How Do You Figure?

It's a standard-function 8-digit calculator, but touch the LCD screen and it's an alarm clock. Touch it again and it's a giant walrus. These miniature versions of the traditional floor fan say "Retro Mini Fan" on them, and the retro part is that the blades and cages are all metal. The handy part is that they're just 5-3/8" dia and the plug is a USB, ready to cool you off right from your (actual) desktop. Tilts 180° up and down and comes with a 4-foot cord. Super quiet, too. Founding Fathers' Quill Pen

OK, this is not your Founding Fathers' quill pen, it's a pharmaceutical company's promo ballpoint but the name is in very small letters, and the white pen has a foot-long genuine fluffy white feather on the end. Fits into a brass-ish ball-socket that mounts via an adhesive pad on the surface of your choice. Adds a nice romantic, if not colonial, touch to any desk or counter, plus you get a half-dozen for real cheap.

Point & Slice Device

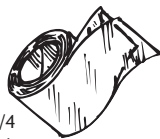

Our snazzy electric pencil sharpener and letter opener is gray and white plastic, 5" x 3-3/4" x 2-1/2". It operates on (4) "C" batteries (yes, of course you buy them) which means you can now open mail and sharpen pencils while camping! It would also take a 6V 800mA adapter with a 5.5mm plug if you've got an extra, and who hasn't? Note that it doesn't have the "spare blades" advertised on the box, but for some strange reason it does have a couple of holes in the top to hold your pens. Ya win some, ya lose some.

Hate Fingerprints On Your iThingy?

The problem with touchscreens is that when you touch them they get smudges all over the screen. Some people, whom we will not judge here lest we be judged, hate that. Bonus: each has a red laser pointer and a white LED flashlight at the non-business end. Measure 4-13/16" long with pocket clips and the batteries are thoughtfully included.

This clear acrylic shatter-resistant ruler from Helix® is 6" long, marked in 1/16" increments (with an offset zero!) and 15cm in 1mm increments. We wouldn't know about that.

Dandiest Donut in the Domain

Donut magnet you can take to town!! 74mm dia x 14mm thick with a 30mm hole. Very strong and well pedigreed - in fact, its kin are activating pacemakers. Okay, we have them because there is the odd bubble, slight scratches or the word MAGNET painted in the coating which ruled them out of the medical ball, but they're fine company nonetheless. Magnetic Opinions

A magnetic opinion for everyone. You get (6) different magnetic stickers, 5" to 6-1/2" across, for your car, locker or fridge, expounding a wide range of often zany expressions. Messages are a bone-shaped "I (heart) my dog," military illustration encircled with "God bless the American Soldier," "Klunker," "Sassy," gas pump noose and a smiley face tongue. Each magnet is pre-priced by a dollar-an-item store at \$2, but we're sticking to our own attractive price!

These were overprints, so the front of each carries an advertisement which is easily covered up, or slightly less easily peeled off, and replaced by YOUR business card! You're gonna love these!

Ceramic Power

Ceramic magnets can be quite powerful and have excellent resistance to demagnetization. These rectangular ones are no exception. Add the power of surplus and we'll give you these mighty-mites for bargain prices. This 3-lb-pull guy is 1-7/8" x 7/8" x 3/8" thick, for mounting bigger pix, we figure.

A Real Grabber

Okay, it isn't the cheapest magnet in the warehouse - but we dragged John's 165 lb filing cabinet around the dock with this 4-7/8" x 1" x 3/4" ceramic magnet, we're rating it conservatively at 100 lbs of pull, and we think it's a bargain. It has a 6" bracket with mounting holes on 5-1/2" centers, plus a 1/2" ID eyehook bolted into the center of it. It's all set to troll the bottom of the lake next time your filing cabinet falls overboard.

Bar¹⁰

Buncha bar magnets made right here in these United States. These are attractive black ceramic, 1-7/8" long x 3/8" square, with an approx 2-lb pull.

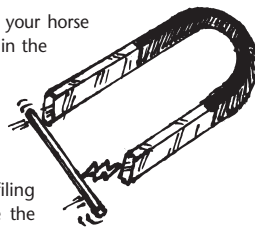

Nice for craft and science fair projects, and priced so that the whole class can experiment with iron filings at the same time. (Guess who sells iron filings?)

Rubber-Coated Horseshoes

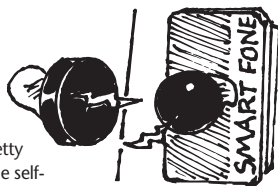

Rubber-coated horseshoes so your horse doesn't make so much noise in the house? No, no, just a little 3-1/2" long x 1-7/8" horseshoe magnet with a red rubber coating on the top half. Has a 1/4-lb pull, so it's great for classroom iron-filing demos or light work. Ignore the "Large, Heavy Duty" label.

Magnetic Mount

Here's a handy little magnetic mounting set that was made for a cell phone but would be happy to hang onto pretty much anything. You stick the self-adhesive 1-1/4" dia x 1/4" thick disc magnet (1.2 lb pull) onto a ferrous surface and the equally self-adhesive 1" dia x really thin metal disc to your phone or whatever it is you keep losing, and now they magnetically cling to each other. (Not for use with kittens; their fur just comes off.).

Fishnets

Not fishnet stockings, but netting for actual fish, direct from the U.S. Army (you'd think Navy, wouldn't you?) in olive drab. It's a survival thing. You get a 10-foot x 5-foot net made of 3/4" squares individually knotted from twisted cotton/nylon, so the net won't unravel if torn. Might have a slightly musty aroma (but definitely not fishy) that a little sunshine time will fix. Great for maritime-theme decoration, bible-camp plays (filled until breaking, walking-on-water background prop...) or, we suppose, fishing. And perfect if you want to go to a costume party as Poseidon.

Throw a Net over It, Marge!

We wouldn't try to capture 'gators with it, but this 4-ft x 6-ft black nylon, elastic (not-un-bungie-like) cargo net should trap anything else in the back of the pickup, van or kids' bedrooms. Stretches to about 6' x 9', with 8" openings that are 7" square, stretching to maybe a foot, and 16 carabiner-style plastic hooks. Or just hang a couple on a wall for a nice Spiderman effect.

Cable and Cable

We wouldn't use them to lock up the Harley, but these 30" long x 3/8" dia stranded-steel cables are perfect for light-duty applications. We'll pick a pair coated with clear, red, green or black vinyl, because we can. The end loops are 1" dia. Add a tiny padlock and they're belts for skinny hipsters.

Shrink Plastic

Incredible stuff!! And even better than those dinky cutouts you used to make! Our each is a pack of (8) 8" x 10-1/2" shrinking plastic sheets that start clear and stay clear. Draw a design, write a message, create a sign, whatever. Cut it out, bake it in a 350° oven for about 3 minutes, and it shrinks to 45% of its original size. Problem with certain pencils and markers on the slick sheets? Try a light sanding (320-400 grit) before writing on it. (The surface will be more opaque.) Mood Sheet

See psychedelic patterns the safe way! Press your hand on this 6" x 6" sheet of liquid crystal and leave a print of swirling colors that, like the mood ring of yore, you can use as a sign of your mood. The pattern will blend and fade in seconds as the crystals react to temperature. Tiny liquid crystals inside the film-like material react to heat by changing colors. As science, it demonstrates the way liquid crystal displays work. And you can cut it into pieces to incorporate into a science project. Or just leave it out for guests to play with when the party turns boring.

They're marked "Pet Bowl," but wouldn't work for anything over kitten size. We'd use 'em for peas, paints, pickles, peanuts, paste, prune pits, like that. Peculiar Injection Vials

We've never seen anything quite like these little clear glass vials, which means they must have myriad uses, particularly at this price. The large one is 1-3/4" tall x 15/16" dia with a shoulder and a 1/2" ID lipped mouth on the top, leading into a 1" deep conical cavity. The bottom has a 5/8" mouth, with an internal lip, and opens into a cavity around the little conical reservoir. So you can fill either end. Which would hold maybe a couple of ccs one way, or 1/4 oz the other way. The little one is the same, but is 1-9/16" tall x 5/8" dia and a 1/4" ID mouth on top, 7/16" on the bottom. We're thinking obscure lab experiments, or chimneys for street-lamps in model railroads. Or something.

Mylar Warmth

They have the look of something designed for the space program. They're mylar, a paper-thin shiny metallic sheet, that comes in handy when your car breaks down in winter, or when you're separated from your climbing group on the slopes of Mt. McKinley. Barring that, they're also a perfect material for a do-it-yourself cold-climate Halloween costume-near impossible to rip by hand, but cut easily with scissors. There's no padding, so they wouldn't be too comfy on your bed, but they sure are warm. They both come folded about the size of a wallet. The Blanket is 52" x 82", the Sleeping Bag is 34" x 84".

Green Laser Par Excellence!

Da Mare could use this to point out cracks in the infrastructure at Wrigley Field. You, having a forgiving nature, will resist the urge to point out cracks in da mayor's infrastructure. You will, of course, use it to point out chimney cracks to the tuck-pointer, a cracked limb to the tree-trimmer, and the crack in your profit picture during a slide presentation. You can do all that and much, much more with the bright light from this 5mW green laser pointer. It's an unbelievable tool. If you need a laser pointer that seems to go on forever and is so strong that you can actually see the beam in the dark, it will be the best low-cost investment you ever made. Or the coolest high-end toy. The 532nm Class IIIa light is 5-5/8" long x 1/2" dia, with (2) "AAA" batteries (included), a momentary-on switch, pocket clip, and case. We don't like to brag, but it's tough not to in a case like this. This is a wonderful pen-shaped laser pointer, 5-1/4" long, flat black or silver with gold pocket clip and head. It throws a red point a loong way (we've thrown it two city blocks, and it would've gone farther, but buildings got in the way). And what are we so proud of? We've seen a very similar item—not identical, mind you, but essentially the same—in one of those glossy, toys-for-grown-men catalogs. Their price? \$20! We're proud not to be profit-mongers; buy it here and you can take pride in your smart shopping habits. Batteries included.

Big hit in 1956, Devil or Angel, by the Clovers, but this isn't it. This is a set of devilishly cute (or angelic) night lights, both 5" tall x 3-1/2" at the hips. Ouch!

Looks like a cheap kid-sized tennis racket, but brother, this ain't for the kids. It's actually a fine way for adults to work on their upper-body strength and kill bugs at the same time. 18" long, with a 6" wide paddle lined with metal grid. A coil in the handle sends high voltage through the paddle when a button is pushed; hit a bug with it and the bug will bug you no more. But despite the manufacturer's claims that it's safe for people, Scott reports that flesh-paddle contact delivers a nasty shock, nasty enough to say "Keep this away from kids!" We've seen these in other catalogs for about twice the price, so buy it from us. Just be careful with it. (2) AA batteries, not included.

Solar Butterfly

All butterflies are solar, we suppose, but this one needs more concentrated power than the cocoon kind. We'll pick either a monarch or yellow swallowtail for you. Spookily real-looking and flying to a fare-thee-well on a delicate 10" inch wire that's mounted on the offset cam of a small DC motor with a butterfly-shaped solar panel. Snug the device, on a 13" dark-green plastic support column with its easy-to-insert stake, close to a plant in the garden or a flowerpot, and it will blend right in. The butterfly won't get tired and won't leave until you move it. Add a "AA" battery for cloudy days or a housebound or night-flying butterfly. So much easier than trying to train nature.

Radiometer

Another oldie but goodie. 5" high evacuated clear glass stand 3" in diameter at the top. A four bladed vane is balanced on a needle inside the sphere. So you don't have a gas jet in the garage? You don't think Margie and Ted are old enough to handle the high temperatures of a Bunsen burner? Our alcohol lamp is the answer. The lamp is shaped like a long-necked ink well, 3-1/2" tall x 3" dia at its widest point and comes with a wick assembly and a handy little glass lid/extinguisher.

Scope Your Stethos!!

Stethos is Greek for chest. Indeed you can scope your stethos with this stethoscope, or your friend's or your dog's. But it works equally well for picking up any sound being transmitted through a solid medium. Listen to the air flowing through the heating ducts, the water in the pipes, the sounds of machinery, the termites munching on the floor joists!! The color does vary so we will select from what's currently available. We've had blue, teal, red, black, burgundy, green and purple, but there may be other colors yet to be seen! A great discovery device whether for biology or other pursuits. Not of professional quality, but not just a toy.

Riot Helmets From Quiet Riots

These police riot helmets have been very lightly used at your smaller riots, so they're in lovely condition. Taken out of service due to slight changes in the county seal decal on the front, they're two-tone, a beige-goldish color and a nearly black dark green, with a short visor. One-size (large-ish) but adjustable with a strap across the back of the head (like a military helmet liner) and an adjustable chin strap. ...Into The Wild СИНИЙ Yonder

Our usually impeccable research, hampered by CJ's limited knowledge of Cyrillic, suggests these military hats (they'd the Class-A dress hats in the US army, or "saucers") once adorned the noggins of a Russian air force members, although only briefly from the good condition. Dark olive with a stylish dark teal band, matching piping around the top and a black plastic brim, they're insignia-free. They're also a little pin-heady, at U.S. Sizes 6-5/8 through 7, but we'll pick anyway because we're short-handed in our Military Millinery Section.

Fallout Shelter Sign

They're Back! Those of a certain age will remember being taught to crouch under their school desks in case of nuclear attack. Shortly thereafter, the gov't, in its infinite wisdom zoomed about the cityscape plastering black and yellow signs on buildings with basements to designate them as fallout shelters wherein it stored cans of water and radiation meters which were so insensitive that any reading could only mean the past tense of crispiness. We have a quantity of these signs, brand new in the sense that they have never been plastered, but antique in the sense that they are the Fifties originals. 10" x 14", 25 ga. galvanized steel. They have a black base coat on the front over sprayed with orange/yellow reflective paint in the familiar design rendered nearby by our faithful artist. Peltier Heat Pump

High tech comes to Am Sci & Surp!! It is here in the form of a Peltier junction, a thermo-electric device that translates electric power into heat, and per-versely, into cool. Apply current @ 3-12 VDC to the gizmo and it extracts thermal energy from one face, thereby cooling it. The heat is dumped onto the other face, thereby heating it. Please note: you must use a heat sink on the hot side or the junction will fry itself, since it can quickly create a 65° C temperature differential in a no load situation. Stack two, or build a cascade to increase the thermal differential created. Or run it backwards. Apply heat or cold to the relevant face and produce a current. Amazing for science projects and experiments. Practical for coffee warmers, beer coolers and mini-refrigerator or warming oven applications. Comes with instructions. Attach Anything!

You need this. Anybody who's ever made a third trip to the hardware store on the same day needs this. The (100) -- count 'em, (100) -- chrome vanadium driver and bit attachments include slotted, Phillips, square (Robertson) head, torx, hex and 12-point bits, plus security Phillips, torx and hex, and (4) different driver adapters (one of which, a super-cute cup-hook driver, has us oddly excited). They're all in a flip-top plastic case. How come it's surplus? If you turn it upside down and shake it, some of the bits fall out of their little size-marked slots. So don't do that. Or stick a thin sheet of foam inside it and all will be well.
